Projects

Email Verifier - Discord Bot | *discord.js, Prisma, PostgreSQL, Next.js* — email-verifier-bot.vercel.app

- Architected a Discord bot with companion auth website that gates server access behind institutional email domain verification (e.g. iiitn.ac.in)
- Implemented privacy-preserving design – discord mods see only the domain, never the full email; verification data auto-purged every 24h via cron jobs
- Built with Bun runtime, Better Auth for magic-link and Discord OAuth, Prisma ORM, and deployed on Vercel with Neon PostgreSQL
- Developed full slash command system (/config, /verify) with both guild-scoped and global command registration

Smriti - Blog Platform | *TypeScript, React, Express, Prisma, PostgreSQL* — smriti-blog.up.railway.app

- Built a full-stack blog platform with PostgreSQL tsvector/tsquery full-text search across titles and content with ranking and pagination
- Implemented Markdown editor with live preview using react-markdown and remark-gfm, user authentication via Better Auth, and responsive UI with shadcn/ui
- Designed database schema with GIN indexes for performant text search, deployed on Railway with Neon PostgreSQL

75orDie - Attendance Tracker | *TypeScript, React, Express, Drizzle ORM* — github.com/cdhananjay/75orDie

- Created a full-stack attendance management system for students to create subjects, manage timetables, and track attendance percentages
- Used Drizzle ORM with Neon PostgreSQL, deployed on Render free tier, featuring responsive UI built with shadcn/ui
